For Immediate Release

October 21, 2019

### **Intaver Institute Releases Project Risk Analysis and Risk Management Software RiskyProject Version 7.1**

Intaver Institute Inc. has announced the release of RiskyProject 7.1. This is a major update and maintenance release that includes several new project risk management and risk analysis features.

Intaver Institute Inc. has announced the release of RiskyProject 7.1. This is a major update and maintenance release that includes several new features. "This is cumulative upgrade that includes all of our development since the release of previous version 7 in 2017. This includes new schedule analytics and reports, improved integration with Oracle Primavera P6, and improved user experience", said Michael Trumper, Intaver Institute's business development manager, "with this update, we are confident that we provide the best value on the market for those companies that are looking to upgrade project risk management and project risk analysis capabilities or replace their existing tools."

RiskyProject 7.1 includes uncertainty bands, schedule consolidation for Monte Carlo risk analysis of large schedules, improved filtering and sorting of the Risk Register, incident management in RiskyProject Enterprise, scenario analysis using multiple cumulative probability plots, project schedule diagnostics and DCMA 14 points schedule inspection, analysis of critical tasks, improved integration with Microsoft Excel, improved usability and other functionalities.
